### HEAVY DUTY FRAME AND DESIGN

For the ultimate in strength and durability, these models feature an 8" I-Beam frame and a 10" I-Beam neck, ensuring a robust and long-lasting structure that can handle even the toughest tasks.

### HEAVY DUTY DUMP BOX

These models are equipped with a 3" x 2" rectangular tubing structural top rail for added strength and durability as well as 10-Gauge floors and sides.

### EQUIPMENT-READY DESIGN

These models can haul equipment such as skid steers right out of the box, and with standard stabilizer ramps, equipment loading is quick and easy.

### EFFORTLESS MAINTENANCE

Our forward self-adjusting brakes make brake maintenance a breeze. The system automatically adjusts the brake shoes as they wear down, eliminating the need for manual adjustments.
